

Continuing Education Packages

Welcome to our Extensive List of Continued Education Packages

With each package you receive a free set of learning modules with online, on-demand courses for up to 10 users.

To access any of these packages please contact your Customer Success Manager.

- Back to School Webinars
- Category Intensive Package
- Reporting Intensive Package
- Institution Administrator Package
- Item Banking
- ExamID + ExamMonitor
- ExamSCORE
- ExamNow
- Contract Renewal Refresher

Back to School Webinars

Get prepared for the new semester! With this package you'll learn how to prepare your portal for a new semester, including how to update your courses, sync your courses and enrollments from an integrated LMS, organize items within courses, prepare new students, and archive expired data if desired.

Includes access to core onboarding content for up to 10 users + 3 webinars on data clean up, student onboarding, and device policies.

- What steps should be completed to refresh the ExamSoft portal for a new academic term?
- How can we prepare new faculty and students for exam day?
- How can we update the portal to archive or retire outdated material?
- What maintenance needs to be done for LMS-synced courses and accounts?

Category Intensive Package

"Categories" is ExamSoft's unique item tagging feature that allows exam-makers and educators to connect individual exam items (questions and rubrics) to specific content areas such as cognitive levels, accreditation standards, learning outcomes, and programmatic objectives. In this Category Intensive package, take a deep dive in category permission management and reports, tagging strategies, and exam blueprinting.

Includes access to on-demand courses for up to 10 users + 90 minutes of consulting time.

- How can our program develop an actionable category-tagging strategy?
- How can we use categories to improve student learning outcomes?
- How can we leverage categories to locate questions in the portal?
- What are the advantages of using blueprinting to create assessments?

Reporting Intensive Package

Assessments delivered through ExamSoft provide educators with actionable data that helps them better understand their students, their course material's effectiveness, and the quality of their exams. In this Reporting Intensive Package you'll learn how to generate and analyze a variety of reports to gather valuable data and make informed decisions about the performance of assessments, categories, courses, and exam takers to assess departmental goals.

✓ Includes access to on-demand courses for up to 10 users + 90 minutes of consulting time.

- What reports can we leverage to prepare for accreditation?
- How can we analyze psychometrics to make informed decisions about item revision?
- How can we compare student and course category performance over time?
- How can we revise our exam review policies?
- What reports are available to investigate student behavior during secure exams?

Institution Administrator Package

This package will prepare top admin users for the responsibilities of managing your portal's Global Settings and other administrative variables. This includes ancillary users' access and permissions, student accounts, LMS operations, longitudinal reporting, and Exam Integrity usage (if applicable).

✓ Includes access to on-demand courses for up to 10 users + 90 minutes of consulting time.

- What should we do to manage faculty and student accounts?
- What are the steps to syncing courses from the LMS at the start of every semester?
- How can we leverage reports to prepare for accreditation?

Item Banking

The effective storage and organization of your question and assessment repositories within Item Bank Courses will ensure a better experience for new and returning faculty users. This package will inform on best practices and strategies for the management of question and assessment items in these spaces.

Includes access to on-demand courses for up to 10 users + 60 minutes of consulting time.

- How can we optimize the structure of my Item Banks?
- What are some recommended organizational conventions to improve experiences for my faculty?
- How do we manage the various items and their placement and retrieval within courses?

ExamID + ExamMonitor

Preventing exam-taker impersonation is a part of protecting assessment integrity. ExamID is an advanced digital security tool that makes the entire identity authentication process faster, easier, and more reliable. ExamID is the ideal solution for both in-class and remote exams by quickly capturing the visual identity of exam-takers, no matter the size of the class.

ExamMonitor is the technology-driven remote proctoring solution that digitally observes exam-takers with video and audio monitoring throughout the entire exam. It provides an alternative to in-person proctoring and confidence in the integrity of your exams.

In addition to on-demand courses, you'll have the opportunity to meet with a Consultant that can answer questions about this product and advise you on best practices for its application.

Includes access to on-demand courses for up to 10 users + 60 minutes of consulting time.

- What invigilation and monitoring options are available with ExamID and ExamMonitor?
- How do we best prepare students for remote exams with this security feature?
- What information does ExamID and ExamMonitor capture and how could it be interpreted?

ExamSCORE

ExamSCORE™
Student-Centered Objective Rubrics Evaluation

ExamSCORE (Student-Centered Objective Rubrics Evaluation) is an easy-to-use grading tool for rubric-based assignments and performance assessments. With ExamSCORE, you can minimize the subjective nature of performance-based assessments, evaluate performance levels based on objective descriptors, and comment on each criterion. Optimized for both computers and tablets, ExamSCORE works wherever you do—on campus, at your home office, and on the go. With ExamSCORE, it's easy to create and apply rubrics to evaluate students in every context, generating powerful insights to improve student outcomes.

In addition to on-demand courses, you'll have the opportunity to meet with a Consultant that can answer questions about this product and advise you on best practices for its application.

✓ Includes access to on-demand courses for up to 10 users + 60 minutes of consulting time.

- What is possible with the ExamSCORE package?
- How is live-grading of Performance Exams managed?
- Where can we include rubrics for grading essay questions and assignment submissions?

ExamNow

ExamNow is an intuitive audience response tool that allows educators to simultaneously increase student engagement and measure student learning. This formative assessment platform allows faculty to easily deliver quizzes in a live, interactive format, while simultaneously engaging students within the learning process. With the ability to tag questions to course and program objectives, ExamNow generates the valuable data that can be used independently to direct immediate curricular decisions or aggregated with summative assessment data to gain insight into class, cohort, or program performance as a whole.

In addition to on-demand courses, you'll have the opportunity to meet with a Consultant that can answer questions about this product and advise you on best practices for its application.

✓ Includes access to on-demand courses for up to 10 users + 60 minutes of consulting time.

- How can we use ExamNow to create a live-feedback experience for students?
- What kinds of data do ExamNow results provide?
- How do ExamNow exams differ from secure Examplify exams?

Contract Renewal Refresher

Thank you for continuing your partnership with ExamSoft! This package provides renewed access to the core on-demand courses for new and incumbent faculty to review as needed. These courses are frequently updated as ExamSoft expands its offerings and new features become available.

✓ Includes access to the foundational on-demand courses for up to 10 users for 1 year.

About Turnitin

Turnitin is a global company dedicated to ensuring the integrity of education and meaningfully improving learning outcomes. For more than 25 years, Turnitin has partnered with educational institutions to promote honesty, consistency, and fairness across all subject areas and assessment types. Turnitin products are used by educational institutions and certification and licensing programs to uphold integrity and increase learning performance, and by students and professionals to do their best, original work.

About ExamSoft

ExamSoft builds digital assessment solutions that provide the highest level of exam security to education institutions. ExamSoft's comprehensive reporting and instant insights help faculty and administrators improve student and program performance with flexible category tagging of key learning objectives. Exams are taken without an internet connection, ensuring a reliable, secure test experience, whether in-class or remote. The ExamSoft mission is to deliver superior digital assessment solutions to increase learning for every student, instructor, and institution. ExamSoft currently serves more than 2,300 prominent academic, certification, and licensing programs and has successfully administered over 107 million exams.
